

Visage Medical Skin Care

Comprehensive Medical Skin Care Spa

Board-Certified physician Dr. Joel Caschette is transforming the practice and perception of facial rejuvenation in Lee County by opening the first comprehensive medical skin care spa in Cape Coral.

Like the Fort Myers office of Visage Medical Skin Care Spa, which Dr. Caschette opened in January, the Cape Coral office will offer ultra-contemporary, non-surgical beauty solutions for nearly every age and condition.

A graduate of Duke University and New York Medical College who served his residency at Geisinger Medical Center in Pennsylvania, Dr. Caschette, 36, began practicing medicine in Fort Myers in 2001. He's a Member of the American Society of Laser Medicine and Surgery, and an Affiliate of the American Society of Cosmetic Dermatology and Aesthetic Surgery.

Dr. Caschette marries two unlikely talents: his state-of-the-art knowledge and capacity to offer highly technical services to his patients, and an old-fashioned humanism: Dr. Caschette usually meets and treats patients himself.

Such care bodes well for patients. "From the first free consultation all the way through treatment, if you see the same practitioner each time, you're much more likely to come across very good results," he explains.

"The whole idea of the anti-aging technology we

have is to reduce the visible age of the skin by three to five years," Dr. Caschette says.

The spa uses such recent and innovative skin fillers as Restylane (which lasts significantly longer than older fillers), BOTOX®, and a microdermabrasion system combined with chemical peels that is medical grade, penetrating deeper and yielding better results. Such options don't exist in salons or spas that lack the medical direction of a physician.

The results, for patients, often seem to defy biological aging, and without surgery. Dr. Caschette and his staff at Visage can massively reduce wrinkles at rest, or wrinkles in motion such as those between the eyes, on the forehead, or formed as so-called crows' feet on the sides of the eyes.

Visage also offers such treatments as laser hair removal using the latest laser technology; intense pulsed light therapy to decrease red and brown pigment in the skin; and laser spider-vein removal for both the face and legs. And with Visage's newest equipment, a light-based acne treatment machine, Dr. Caschette can reduce or eliminate the constant need for prescription acne medications for his patients.

Fort Myers: 14271 Metropolis Avenue, Unit B **239-945-VISAGE (8472)**

Cape Coral: 2311 Santa Barbara Boulevard, Unit 114, in the Shoppes at Santa Barbara **239-945-VISAGE (8472)**
